SOFTWARE ENGINEER

SUMMARY

Dedicated software engineer with a solid background in developing reliable, high-performance systems. Skilled at solving complex technical problems and creating innovative solutions that drive business growth. Passionate about transforming technological challenges into efficient software that meets critical organizational needs.

SKILLS

Frontend Technologies:

- React
- Angular
- Bootstrap
- Tailwind
- JavaScript

Backend Technologies:

- PHP,
- Laravel
- Java & Spring Boot (basic)
- MySQL

Methodologies:

- GIT,
- Bitbucket
- Agile,
- Docker,

WORK EXPERIENCE

Simpliaxis Solutions Pvt. Ltd

Feb 2024 - Present

- Spearheaded the development of web applications using microservices architecture,
- ensuring scalability and modularity.
- Managed frontend and backend systems, focusing on performance optimization and code reliability.
- Managed build and deployment processes for rapid release cycles.
- performance and scalability.
- Collaborated in an Agile environment, designing RESTful APIs to enable seamless

Volmint Technology

Dec 2022 - Jan 2023

- Engineered university management systems covering registration, exams, and course management, improving system functionality.
- Managed backend development, ensuring system performance and reliability.
- Implemented role-based access controls, enhancing security for various user roles.
- Embraced Agile methodologies to optimize project management and team collaboration,
- improving code quality and delivery timelines.

Globussoft Pvt. Ltd

Sep 2021 - Oct 2022

- Contributed to the development of client-facing applications with a focus on responsive design and user accessibility.
- Assisted in building and maintaining REST APIs for data exchange between front-end and back-end, ensuring reliability and performance.
- Supported Docker-based deployments and CI/CD configurations to streamline the development workflow and improve code quality.

PROJECTS

Angel Monkey Ecommerce

Developed a comprehensive eCommerce platform using Next.js, Laravel, and MySQL, focusing on delivering a seamless shopping experience with cutting-edge web technologies.

- Backend Development:
 - Implemented robust Laravel APIs for secure user authentication, product management, and order processing
 - Ensured data integrity and secure transaction handling
 - Integrated AWS S3 bucket for efficient image storage and management
- Frontend Development:
 - Designed a responsive user interface with Next Js and Talwind for providing an intuitive shopping experience across devices. Feature Integration: Added functionalities such as user account management, product search, and payment gateways.
 - Implemented role-based access control to differentiate between admin and customer functionalities.
 - Performance Optimization: Applied caching and database indexing strategies to enhance application speed and scalability.
 - Implemented a comprehensive admin dashboard with role-based access control, enabling full website management including product inventory, user accounts, and order processing.

Plation at Home Ecommerce

Developed a comprehensive eCommerce platform using Next js, Laravel, and MySQL, focusing on delivering a seamless shopping experience. This project involved:

- Engineered a comprehensive online nursery plant selling platform utilizing Angular, SCSS, Bootstrap, and Laravel REST API with MySQL, creating an intuitive web application for plant enthusiasts.
- Developed responsive frontend with Angular's latest version, implementing dynamic components for seamless product browsing and user interaction using SCSS and Bootstrap.
- Constructed robust Laravel REST APIs with secure endpoints for product management, user authentication, and order processing, designing an efficient MySQL database schema for inventory and transaction tracking.
- Implemented a comprehensive admin dashboard with role-based access control, enabling full website management including product inventory, user accounts, and order processing.

EDUCATION

Master of Computer Application	2020-2022
Gaya College, Gaya (Affiliated with Magadh University, Bodhgaya)	
Bachelor of Computer Application	2016 - 2019
Gaya College, Gaya (Affiliated with Magadh University, Bodhgaya)
