SUMMARY

As a seasoned DevOps professional with 5 years of experience, I excel in architecting and automating complex software lifecycles, designing scalable AWS cloud infrastructure, and ensuring uninterrupted system uptime at enterprise scale. My expertise spans advanced CI/CD orchestration, infrastructure-as-code implementations, containerization strategies, and adept troubleshooting across distributed systems. Proficient in modern messaging systems, caching layers, code quality automation, and comprehensive observability solutions, I specialize in optimizing third-party integrations to meet strict SLOs. I've achieved 54% cost reduction on RDS databases while maintaining performance. My passion lies in leveraging cutting-edge technologies to drive efficiency and deliver exceptional results.

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate
- Google Cloud Certified Cloud Digital Leader

EXPERIENCE

Trigyn

Senior Software Engineer

05/2025 – Present | India

Project: National-scale Digital Document Wallet Platform

- Designed and managed AWS ECS-based microservice deployments with auto-scaling, service discovery, and integration with ECR, CloudWatch, and IAM.
- Configured RabbitMQ messaging infrastructure on EC2.
- Set up SonarQube on AWS with Jenkins integration.
- Enhanced Jenkins pipelines with multibranch strategies and shared libraries.
- Implemented Redis Cluster for high availability.
- Managed MongoDB backup strategies.
- Configured AWS CloudWatch metrics, logs, dashboards and SNS alarms.

GlobalLogic

Senior Software Engineer

06/2022 – 07/2024 | Noida, India

Project: Deployment of Event Booking App

- Provisioned AWS infrastructure using Terraform.
- Automated configuration using Ansible.
- Containerized microservices with Docker.
- Built CI/CD pipelines with Jenkins.
- Managed Kubernetes workloads.
- Integrated Prometheus/Grafana and ELK.

Project: Disaster Recovery for Leading Pet-Insurance App in USA

- Implemented one-click DR deployments using IaC.
- Provisioned AWS services using AWS CDK.
- Used Helm, Istio, Datadog and Python automation.

- Managed secrets with AWS Systems Manager.

Project: Optimizing Integrations for Leading CCAAS Providers in USA

- Configured Datadog and CloudWatch monitoring.
- Used Azure DevOps pipelines and Boards.
- Managed repositories using Bitbucket and Azure Repos.

Wipro

Project Engineer

07/2019 – 09/2020 | Bangalore, India

Project: Ratings and Review Services for an E-Commerce Website

- Worked in Agile framework.
- Developed Java Spring Boot microservices.
- Containerized applications using Docker.
- Automated CI/CD using Jenkins.

SKILLS / TOOLS

Operating Systems: Red Hat Linux, CentOS, Ubuntu, Debian, Windows

Programming Languages: Java, Python, YAML

Container Management: Docker, Kubernetes, ECS, ECR

Cloud Platforms: AWS (EC2, S3, IAM, VPC, ECS, EKS, CloudFront, RDS, Lambda, etc.), GCP (Compute Engine, App Engine, Cloud Storage)

CI/CD: Jenkins, SonarQube, Azure DevOps Pipelines

Infrastructure as Code: Terraform, AWS CDK, CloudFormation, Serverless Framework, Boto3

EDUCATION

Post Graduate Diploma in Artificial Intelligence and Machine Learning

NIT Warangal | 07/2022 – 06/2023 | India

Bachelor of Technology, Computer Science (First Class)

Galgotias University | 09/2015 – 05/2019 | Greater Noida, India
